## Professional Summary

Computer Science graduate with hands-on experience in full-stack web development using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in developing web applications, REST APIs, and workflow automation systems, with internship experience on a live production website. Seeking a MERN Stack Developer role to build scalable and maintainable web applications.

## Skills

**Programming Languages:** JavaScript, C, C++, PHP

**Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, Express.js, PHP, CodeIgniter

**Databases:** MongoDB, MongoDB Atlas, MySQL

**Tools & Platforms:** Git, GitHub, cPanel

**Core Subjects:** Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Computer Networks

## Experience

### Web Developer Intern

February 2026 – May 2026

Gyan Ganga Genesis Incubation Centre

Jabalpur, On-site

- **Tech Stack:** React.js, Next.js, Node.js, Express.js, MongoDB, PHP, CodeIgniter, Tailwind CSS, MySQL
- Worked on **4 live projects**, contributing to web application development, feature implementation, maintenance, and improvements across production systems.
- Developed and maintained website modules for the live production website ggce.co.in, focusing on functionality, usability, and content management.
- Built a **leadership meeting scheduling system** featuring an automated approval workflow to streamline meeting requests and approvals.
- Integrated **email notifications** for meeting approvals and status updates, improving communication throughout the workflow.
- Developed **ERP modules for data management and marketing analytics** to organize business information and present relevant insights through user-friendly interfaces.
- Contributed to backend functionality and database integration using the technologies relevant to each module.
- Improved website SEO, content management workflows, and user experience across multiple pages.

## Projects

### IngredientInsight AI – Smart Food Ingredient Analysis System

January 2026 – April 2026

- **Technologies:** React.js, Node.js, Express.js, MongoDB Atlas, Google Gemini AI, Tesseract OCR, Tailwind CSS
- Developed a full-stack AI-powered web application to scan food labels and analyze ingredients from uploaded images.
- Integrated Tesseract OCR and Gemini AI to extract ingredient information, assess potential health risks, and generate recommendations.
- Implemented a MongoDB-based system to store and retrieve ingredient analysis results for reuse.
- Built a food safety scoring system to flag potentially harmful ingredients and identify ingredients requiring attention for diabetic and heart-sensitive users.

### Remote ECG Monitoring System

January 2024 – September 2024

- **Technologies:** ESP32, AD8232, Embedded C/C++, ThingSpeak
- Developed an IoT-based ECG monitoring system to capture real-time heart signals.
- Transmitted ECG data over Wi-Fi to a cloud platform for remote monitoring.
- Enabled real-time visualization and basic analysis of ECG signals.

## Certifications & Achievements

- **Smart India Hackathon 2024** – Team Leader; secured 9th rank among 150+ teams in the intra-college round.
- **Cyber Security Training Program** – Cisco Networking Academy and BSNL BRBRAITT.

## Education

### Bachelor of Technology (B.Tech) - Computer Science Engineering

2022 – 2026

IoT, Cyber Security & Blockchain — GGITS, Jabalpur

CGPA: 7.94 / 10
